# EMOTIVA

The RMC-1 Differential Reference™ Cinema Processor is a 16-channel, fully balanced, analog preamplifier with a high-speed quad-core 64-bit digital processing engine, 32-bit/768k AD/DA conversion, and 4K UHD video management system, controlled by a custom Linux™ operating system. The RMC-1 supports full 4K UHD video and offers advanced support for 7.3.6 Dolby Atmos™ and DTS-X™.

Dirac Live™ room correction ensures perfect synergy between your RMC-1 and your listening room. The fully modular system architecture makes service simple and upgrading for the future possible.

- HDMI 2.0B HDCP 2.2
- 4K UHD
- Dolby Atmos™ and DTS-X™
- 16 Fully Balanced Differential Reference™ Outputs
- AKM Verita 32 Bit 768k DAC on all channels
- Dirac Live™ with Reference Calibration Microphone
- Modular Expansion Bays
- DSD Support

Proudly designed and built by Emotiva in Franklin, Tennessee, USA
